Quick tip for people on Laptops

Windows

Download PuTTY <http://www.chiark.greenend.org.uk/~sgtatham/putty/download.html> if you are on OS X

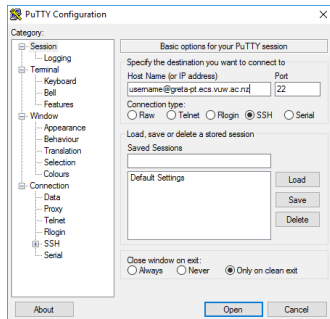

OS X

Open a terminal and use ssh. if you are on OS X

SSH into Lab computers: OS X

```
ssh username@greta-pt.ecs.vuw.ac.nz
```

SSH into Lab computers: Windows

Then type in your password etc. . . to get into the *shell* of the University computers

How to start?

So, you want to learn how do we start?
